PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 6+ years of experience building scalable frontend systems, developer tooling, and AI-powered applications. Proficient in React.js, TypeScript, Node.js, and Micro Frontend Architecture. Currently leading AI development initiatives at LexisNexis, including building a custom MCP Server that reduced component development time by 98%. Experienced working within Agile/Scrum teams, contributing to microservice-based architectures, and delivering high-quality code through unit testing, code reviews, and CI/CD practices.

EXPERIENCE

Software Engineer III, LexisNexis Canada, North York, Ontario

March 2025 – Present

- Built a custom MCP (Model Context Protocol) Server in Node.js that accepts a UI screenshot and auto-generate production-ready React + TypeScript components, reducing development time from 4 hours to under 5 minutes (98% faster).
- Architecting GitHub Copilot integrations, custom AI agents, and automated workflows to accelerate engineering velocity across the organization.
- Designed and built a reusable Fluent UI component library, improving UI consistency and reducing implementation time for new features.
- Built Microsoft Word add-ins using React.js and Micro Frontend Architecture for seamless Office.js integration.
- Led a team of 4 engineers — conducting design reviews, mentoring architecture decisions, and enforcing testing and accessibility standards.
- Drove a 20% system performance improvement through systematic code refactoring and modular design patterns.

Software Engineer II, LexisNexis Canada, North York, Ontario

May 2023 – February 2025

- Converted wireframes and mock-ups into fully functioning, responsive React features with cross-browser compatibility across Chrome, Edge, Firefox, and Safari.
- Identified and resolved critical frontend technical debt, contributing to a 20% improvement in system performance.
- Mentored junior engineers in TypeScript, react patterns, and test-driven development, resulting in a 15% lift in team productivity.
- Established code review processes using Husky Commit and continuous delivery practices, reducing post-release defects, and improving delivery quality.
- Worked within an Agile/Scrum framework for sprint planning, estimation, and feature delivery.

Software Engineer I, LexisNexis Canada (AppFabs Inc.), Mississauga, Ontario

September 2022 – April 2023

- Built a Microsoft Word add-in using React, OfficeJS, and Fluent UI with full accessibility compliance.
- Developed an Admin Centre with Angular 15 and Angular Material, improving admin workflow efficiency by 25%.
- Reduced frontend bug count by 30% by implementing comprehensive unit and integration tests with Jest and React Testing Library.

Software Engineer, Code Symphony LLP, Jamnagar

September 2019 - December 2020

- Designed and developed 5+ full-stack and frontend web applications using React, Node.js, Express, and MongoDB.
- Implemented Redux state management that improved site performance by 25%.
- Mentored 5 interns through pair programming and code reviews, boosting team coding efficiency by 30%.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js, REST APIs, GraphQL

Languages: JavaScript (ES2022+), TypeScript, Python, Java, C#.NET, HTML5, CSS3

Frameworks: React Native, Angular, Java Spring Boot, Fluent UI, Angular Material

AI & Developer Tooling: MCP Servers (Node.js), GitHub Copilot, Custom AI Agents, Agentic Workflows, Claude Code, OfficeJS Add-ins

CI/CD & DevOps : CI/CD Pipelines, AWS, Heroku, Kubernetes, Webpack, Vite

Testing: Jest, Cypress, React Testing Library, Unit Testing, Integration Testing

Tools & Methods: Git, GitHub, Jira, Redux, Redux Toolkit, Redux-Saga, Agile/Scrum

Databases: MongoDB, PostgreSQL, MySQL

EDUCATION

POST GRADUATE CERTIFICATE

January 2021 – August 2022

Lambton College, Mississauga, Ontario

Computer Software & Database Development | GPA: 3.7/4.0

BACHELOR'S DEGREE

August 2015 - May 2019

Gujarat Technical University, Ahmedabad, Gujarat

Information Technology | GPA: 3.0/4.0

PROJECTS & CERTIFICATIONS

- [DevCamper API](#) | Designed RESTful APIs using Node.js, Express, MongoDB with security best practices and JWT authentication
- [Google Cloud Fundamentals: Core Infrastructure \(GCP\)](#) | Coursera | April 2020
- [Python Data Structures](#) | Coursera | April 2017
